

4:11 ENVIRONMENTAL EDUCATION POLICY

Created: May 2015

RATIONALE

Let's Grow Early Learning Centre places importance on being environmentally aware and committing to making sustainable objectives that are embedded into our daily programme.

Learning for sustainability fosters the concept of kaitiakitanga, which means guardianship of the environment. Learning about our environment and how we connect with will empower our children, families and teachers to take an active role in nurturing all living things.

Procedures

Teachers will promote a sound awareness of and positive attitudes towards the environment amongst our children, families, staff and visitors to let's grow.

We will foster children's capacity to understand and respect the natural environment.

We will conserve resources through the management of water, energy and paper consumption.

We will promote the use of natural resources and recycled items in our learning environments.

We will commit to recycling waste.
